SUMMARY

Android Developer with 2 years of experience building production-ready Android applications using Kotlin and Jetpack Compose. Experienced in Clean Architecture, MVVM, MVI, REST APIs, Firebase, and modern Android development practices. Also experienced in Flutter development, with a strong understanding of both native Android and cross-platform mobile development.

TECHNICAL SKILLS

Languages: Kotlin, Java, Dart

Frameworks & Tools: Android SDK, Jetpack Compose, Kotlin Coroutines, Flow, XML, Retrofit, Hilt, Room, DataStore, Paging 3, Firebase, Flutter

Architecture & Patterns: Clean Architecture, MVVM, MVI, SOLID Principles, Design Patterns, Dependency Injection, State Management

Data & Testing: REST APIs, Postman, OOP, Agile, Jira

Version Control: Git, GitHub, Bitbucket

WORK EXPERIENCE

Android Developer — Generation C | Cairo | Hybrid | Jul 2024 – Present

- Built **SHIFT**, a tech-driven mobility app offering car-rental and ride-hailing services, developed from the ground up and shipped to Google Play.
- Built and shipped **3 production Android applications** to Google Play.
- Developed **Authentication, Booking, Payments, Chauffeur, and Car Sharing** modules using Kotlin, Jetpack Compose, MVI, and Clean Architecture for scalable development.
- Designed complex UI flows, deep-link navigation, and state management ensuring a seamless user experience.
- Integrated full multilingual support (including Chinese) and contributed to performance optimization and internal testing.
- Collaborated with iOS, Backend, and DevOps teams under Agile methodology (Jira, Bitbucket, Firebase Distribution).
- Successfully published production Android applications to Google Play including — [Shift Driver](#) | [Shift Employee](#)

Flutter Developer — NewtecX | Doha | Remote | Nov 2024 – Jan 2025

- Contributed to a project for Qatar Financial Markets Authority (QFMA), focusing on UI/UX enhancements and feature additions, and assisted in developing an ERP system to improve operations and workflows.
- Prepared app for deployment on Google Play and Apple App Store.
- Collaborated with back-end and QA teams for seamless integration.
- Technologies: Flutter, Dart, Firebase, REST APIs, Cubit, Bloc, Clean Architecture.*

PROJECTS

News App | [GitHub](#)

Technologies: MVM, MVI, Clean Architecture, Retrofit, Room, DataStore Preferences, Dagger-Hilt, Paging 3, Jetpack Compose, State Management, Shimmer Loading, Animations

- Android app allowing users to browse the latest news, search for topics, bookmark articles, and read full content seamlessly.
- Delivers smooth and modern reading experience with efficient data loading and offline support.

DR.Scan — Graduation Project | [GitHub](#)

Technologies: Flutter, Firebase (Firestore), Machine Learning Model Integration, GetIt, Provider | Role: Team Leader, Flutter Developer

- Flutter-based app that simplifies medical test interpretation and diagnosis.
- Patients can access test results, get symptom guidance, and connect with healthcare specialists anytime, anywhere.

EDUCATION

Bachelor's Degree, Computer & Information Sciences — Software Engineering

Mansoura University | 2019 – 2023 | GPA: Very Good | [Graduation Certificate](#)

ITI — Android Application Development

[ITI Certificate](#)

CERTIFICATIONS

Flutter Development Diploma — Route Academy | 2023–2024 | [Certificate](#)

Android Development Diploma — Route Academy | 2025–2026 | [Certificate](#)

Flutter & Dart Development Course — Udemy | [Certificate](#)

Flutter Advanced Course — Bloc and MVVM — Udemy | [Certificate](#)
